

Getting Started with Aidos

This guide walks you through using Aidos for the first time — from creating your account to downloading your protected images. The process is quick, simple, and requires no technical expertise.

01

Sign up

Create your account using the **Start free trial link**. Use an email address from your education facility and a strong password with 12+ characters.

Check your inbox (or spam) to authorise your login.

02

Try Aidos for free

Once signed in, you can protect **up to 15 images for free within one project**, with no obligation to continue.

We advise that you use all 15 free images to get the best trial of Aidos.

03

Upload your images

Create a project, choose a title, for example, 'Sports Day', this is where you will upload your images. Each project allows you to upload 20 images at a time.

04

We'll notify you

You'll receive an email as soon as your images are ready to download.

Just click on the link in this email when you're ready to get your images.

05

Download your protected images

If you are not happy with any images you can re process for free (more information on this below)

Please note: images processed during the free trial include a small watermark.

06

Continue using Aidos

If Aidos is right for your school, choose your preferred subscription.

We will contact you to arrange payment and answer any questions.

Once subscribed, images are delivered without watermarks.

A note on AI processing & Aidos's free reprocessing & refining functions

Aidos uses AI to protect pupil images and achieves a high rate of right-first-time results. We understand, however, that you may wish to explore a few options before settling on an image you're completely happy with. That's why we've built **unlimited free reprocessing and refining** into Aidos as part of our commitment to continuous improvement.

If you choose the reprocessing option to **reprocess** your images this will allow AI to make a new selection for you

If you decide you would like more input click on the image you would like to change and click the button that says **refine**, this will allow you to check and input sex, ethnicity and age.

- 👁 Reprocessing and refining does **not** use your image allowance
- 👁 Images can be reprocessed or refined multiple times
- 👁 Reprocess and refine all images, or only selected ones

Our aim is to ensure complete confidence in the images you use.
